

BUSINESS INTELLIGENCE REPORTING

With actionable insights,
BI reporting helps your business to
improve decisions and performance

INFO AT YOUR FINGER TIPS

See who your most profitable employees are and understand profitability across different departments. Uncover which services are most valuable and which ones are holding you back, wellness reports with Performance based workflow information per employee per department.
DAILY | WEEKLY | MONTHLY | CUSTOM - REPORTS
Integrated with Time and Attendance.
Improve your business processes and make more money and better people decisions

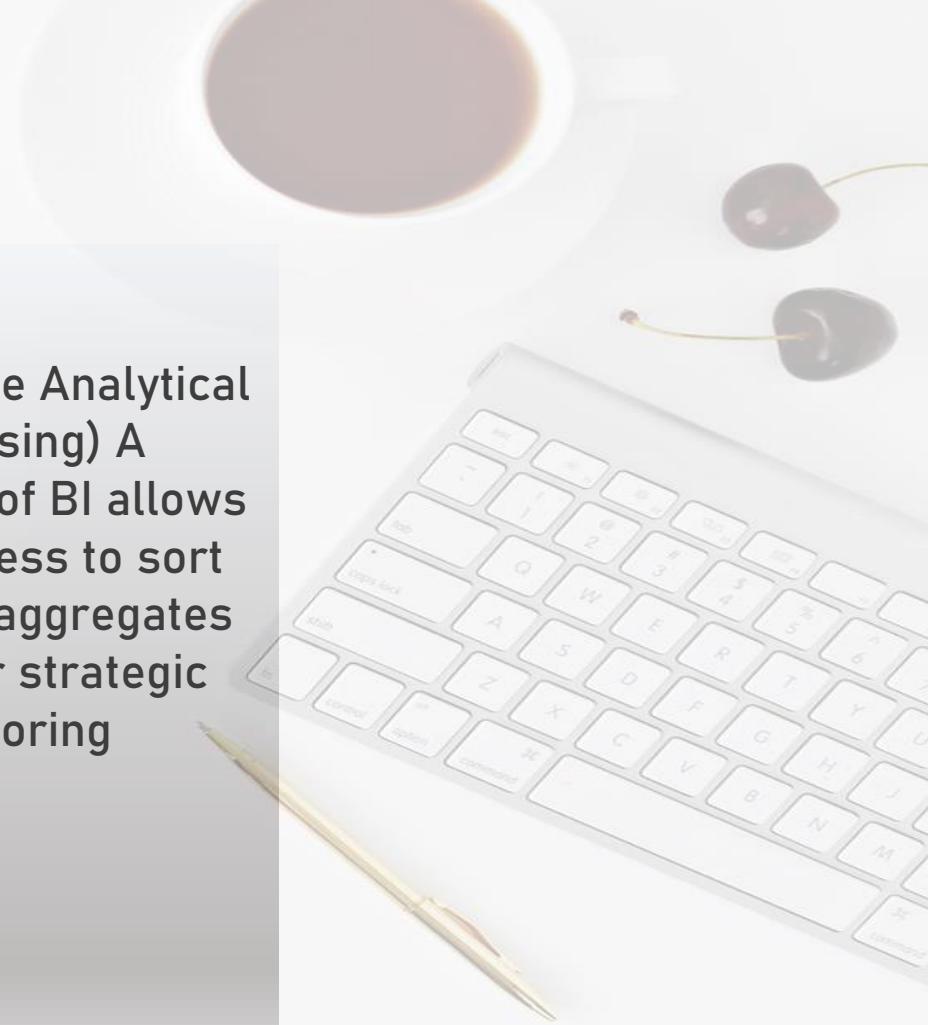

CUSTOM REPORTS

This series of invoicing reports helps you understand where your time is going. View staff timesheet entries to see resource allocation and capacity. View estimated hours against actuals and know if you're on track with what you have quoted. Get better visibility over staff productivity by viewing time billed versus time remaining

Want to report on custom fields? Create relevant and specific reports for your business. Add as many or as few fields and criteria as you like to get the information you need. There are also dozens of sample reports that you can modify

OLAP (Online Analytical Processing) A component of BI allows your business to sort and select aggregates of data for strategic monitoring
